ABSTRACT

Statistical data and summary analyses on the Basic Educational Opportunity Grant (BEOG) Program for the 1977-78 award year are presented in this annual report intended as a status guide or desktop reference manual. For the first time the report contains information based on merged applicant/recipient data. The tables provide summary statistics for cross-year reference and by type of institution. Distribution of BEOG recipients is tabulated by student eligibility range, family income, grant level, educational cost range, and type of institution. Other tables show the distribution of Basic Grant recipients, grant expenditures, and average grants by type and control of institution; and the distribution of recipients by state and control of institution. ERRATA

In May 1979, the Basic Grant Analysis Section issued the 1977-78 End-of-Year Report containing general information and tables presenting distributions of recipient characteristics. In spite of many hours spent checking the technical accuracy of those tables before the report was issued, we have subsequently found that the recipient income distributions shown in the original report are incorrect. The coding error which caused the problem has been corrected and Table Series 3, 4, and 10 containing the correct income distributions are attached. No other tables were affected by the error. We suggest that you insert these tables in your 1977-78 End-of-Year Report for ready reference. Please note that only distributions by income shown in the attached tables were affected. All other distributions, as well as expenditure and recipient totals, are correct as shown in the original report.

The table series that needed to be revised are as follows:

- Table Series Three

  Distribution of Basic Grant Recipients by Student Eligibility Index Range and Family Income for:

  Grand Total Recipients - Table 3A
  Dependent Recipients - Table 3B
  Independent Recipients - Table 3C

- Table Series Four

  Distribution of Basic Grant Recipients by Family Income and Grant Level for:

  Grand Total Recipients - Table 4A
  Dependent Recipients - Table 4B
  Independent Recipients - Table 4C
  Social Security Recipients - Table 4D
  Veteran Recipients - Table 4E
  Dependent Veteran Recipients - Table 4F
  Independent Veteran Recipients - Table 4G

- Table Series Ten

  Distribution of Basic Grant Recipients by Family Income Range and Education Cost Range for:

  Grand Total Recipients - Table 10A
  Dependent Recipients - Table 10B
  Independent Recipients - Table 10C

We sincerely regret any inconvenience which this error may have caused you.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
OFFICE OF EDUCATION
BUREAU OF STUDENT FINANCIAL ASSISTANCE
WASHINGTON, D.C. 20202

APR 30 1979

Dear Colleague:

Enclosed for your information is the Basic Educational Opportunity Grant Program "End-of-Year Report" for the 1977-78 award period. For the first time, the "End-of-Year Report" contains general information and statistical tables based on merged applicant/recipient data. Also, the report includes a brief description of program trends for the award periods 1973-74 through 1977-78, as well as summary tables for 1977-78 regarding various characteristics of Basic Grant recipients.

It is intended that this report be used as a summary status guide or desktop reference manual on the Basic Grant Program.

We hope that this information will be useful to you. We appreciate your continuing interest and support of the Basic Grant Program.

Sincerely,

Leo L. Kornfeld
Deputy Commissioner for
Student Financial Assistance

Preface

For the past several years, the Basic Grant Program Analysis Section has routinely produced an End-of-Year Report intended for use as a status guide or desktop reference manual on the Program. Because of technical difficulties associated with merging millions of records on applicants and the recipient or award data from postsecondary education institutions, previous End-of-Year Reports have been divided into two sections: Applicant Statistics and Recipient Statistics. Distributions of student characteristics were presented on "eligible applicants" and many resulting inferences were drawn assuming that all eligible applicants continued their postsecondary education plans, actually enrolled in a school and received awards. It has always been recognized that this assumption could not be supported in all instances. Within the past year, the technical difficulties associated with merging the separate data files have been largely overcome and, for the first time, the universe file consisting of the merged applicant and recipient files has been utilized to produce the 1977-78 End-of-Year Report.

Because the Basic Grant Analysis Section has decided to use the merged applicant and recipient files to produce this End-of-Year Report, the remainder of these prefatory remarks will be devoted to outlining other decisions regarding the universe file which will circumscribe any inferences that can be drawn about these data.

1. Timeliness of Data

The data processing industry has developed an axiom known as the "Rule of 90" regarding any large data processing system. Basically, data processing experts recognize that 90 percent of all records can be routinely processed, but that 10 percent of the transactions will concern detected problems associated with keypunch error, miscoding, etc. Furthermore, data processors anticipate that 90 percent of their time and personnel resources will be expended in resolving those 10 percent problem cases.

It appears that the Basic Grant Program is not exempt from the "Rule of 90." Consequently, the vast majority of records are generally available for analysis shortly after the close of the academic year in June, but error resolution on the data file requiring human intervention proceeds at a painstakingly slow pace as additional records are transferred from various "suspense" files to the "clean" universe file.

The possibility of error is introduced by virtue of incorporating into the universe of records those which contain unresolved data problems. On the other hand, waiting until the resolution process was completed and all records were on the clean file would mean that this report could not be published in time for maximum utilization of its statistics.

Generally, it was observed that users truncated or "rounded" numbers to a considerable degree for purposes of clarity and simplification. Under these conditions, the attempt to achieve absolutely "final" or "complete" tabulations became a spurious effort.

Also, during the review of interim tabulations from incomplete files, it was noticed that while the raw numbers in the data cells changed somewhat, the percentages tended to remain constant or were altered almost imperceptibly. This signified that the records on the suspense files were distributed normally throughout the population. Since users appeared more interested in percentage distributions rather than raw numbers, the additional time required to transfer several hundred, or even several thousand, more records to the "clean" universe file was not warranted.

Finally the decision was made to "freeze" the file in December and report all statistics as collected to that point. In so doing, readers should be aware that the statistics as reported herein will be subject to future reconciliation and the total number of recipients should grow slightly; but as stated above, no significant alterations in the data distributions are anticipated because of this.

2. Roster Reconciliation

Another point which should be stated is that award (recipient) data are derived from the Student Eligibility Reports (SER) submitted by the institutions to the Office of Education with their Institutional Progress Reports. This factor is noteworthy because award data as reported herein is synomous with "Expected Disbursements" as indicated on each individual SER when completed by the Financial Aid Administrators at the time they prepare the student financial aid packages.

It is known, however, that some students change their postsecondary education plans subsequent to this point, e.g., they may change from full-time to half-time status later in the school year, or drop-out of school for the second term, etc.

When student rosters for schools are printed, adjustments are made by the schools to these records, actual disbursements indicated, and the rosters are returned to the U.S. Office of Education. Obviously, this procedure introduces yet another, and somewhat considerable, time delay. Although it is recognized that this reconciliation process is likely to alter some distributions, it was concluded that users of these data should be aware of this fact, but that timeliness of reporting these data should supersede the reconciliation process.

3. Geographic Location

Several of the tables included in this report distribute recipients by "state" location. For the purposes of this particular demographic parameter, two (2) choices were available: (1) the state of legal residence for applicants or (2) the location of the postsecondary institutions which applicants attended. Obviously, needs arise for both types of distributions; but in the past, the most predominant request was for distributions of students and awards by "school location within states" rather than by "state of legal residence." Accordingly, the decision was made to distribute statistics within this report by state according to the location of the school.

4. Classification of Postsecondary Institutions

Information as to type and control of institutions is data taken directly from institutional Progress Reports. During previous academic years, some institutions did not report level and type; thus, they could not be classified or categorized as either public, proprietary or private, non-profit. For this reason an "Other" category was established to include those institutions that could not be classified.

During December 1977, improved institutional level edits were implemented into the SER processing system and more complete entries of available information on postsecondary institutions were added to the Universe file. Therefore, although the category "Other" which was utilized in previous academic years is present on the tables, there are no entries in the category.

Finally, any comments or suggestions for future enhancement of this report should be addressed to:

Table 1 Summary Statistics for Cross-Year Reference

Table 1 is a summary table which presents data from academic year 1973-74, the first year of the Basic Grant Program, through academic year 1977-78.

As can be observed from the data, the Basic Grant Program has experienced almost a 750% increase in the number of applications processed from the first year of operation during the 1973-74 academic year to the 1977-78 academic year. It should also be noted that during these years, the student population eligible for awards has been expanded from full-time freshmen in 1973-74 to all classes of students in 1977-78.

One data element which needs further clarification is the category "number of applications returned for insufficient data." This category includes only those applications which were returned to students for further information and which were never returned to Basic Grants for re-processing.

Of the 3,844,047 applications in 1977-78, there were 3,621,641 valid applications, with 2,390,320 qualified applicants and 1,231,321 non-qualified applicants. Of the 2,390,320 qualified applicants, some 1,863,990 recipients in 1977-78 actually enrolled in an approved postsecondary education institution, submitted Student Eligibility Reports, and actually received an award. The number of recipients in 1977-78, however, needs further clarification. The number of recipients which appears in the Summary Cross-Year Reference Table represents the total number of program recipients. Technically, recipients are classified as two distinct types: Regular Disbursement Students (RDS) or Alternate Disbursement Students (ADS). An RDS recipient is one who receives his/her grant directly from the institution he/she attends. However,

an ADS recipient receives his/her grant directly from the Basic Grant Alternate Disbursement Unit, which is part of the Office of Education. The reason the ADS recipients do not receive their grants directly from the institution is that they are attending an eligible institution that does not participate in the Basic Grant Program. Therefore, the figure that constitutes the total number of recipients for the Basic Grant Program is the combined total of RDS and ADS recipients.

For academic year 1977-78, the number of ADS recipients is 17,910, while the RDS recipients figure is 1,846,080. Combining these two figures gives a total number of recipients of 1,863,990. It is important to note that Table 1 is the only table where the combined total of ADS and RDS recipients is used. All of the remaining tables in the 1977-78 Basic Grant End-of-Year Report will reflect only RDS recipients. Consequently, the total number of recipients that will appear in all of the remaining tables will reflect only the RDS figure of 1,846,080.

Table 1 also presents total expenditures, which includes funding for ADS recipients as well as RDS recipients. Again it should be noted that Table 1 is the only table in this year's report that includes both ADS and RDS statistics. Consequently, the total expenditures figure of $1,587,863,624 will be altered in the remaining tables to reflect only RDS funding of $1,574,999,886.

Other program variables that this Table presents are the average, minimum and maximum BEOG grant. Of these three variables the minimum and maximum grant have remained constant from 1975-76 to 1977-78, while the average grant has increased from $763 in 1975-76 to $852 in 1977-78.

TABLE 1
BASIC EDUCATIONAL OPPORTUNITY GRANT PROGRAM
SUMMARY STATISTICS FOR CROSS-YEAR REFERENCE
ACADEMIC YEAR 1977-78

	ACADEMIC YEAR				
	1973-1974	1974-1975	1975-1976	1976-1977	1977-1978
NUMBER OF APPLICATIONS PROCESSED	512,866	1,304,877	2,339,337	3,590,379	3,844,047
NUMBER OF APPLICATIONS RETURNED FOR INSUFFICIENT DATA	30,535	190,793	160,641	181,661	222,406
NUMBER OF VALID APPLICATIONS	482,331	1,114,084	2,178,696	3,408,718	3,621,641
NUMBER AND PERCENT OF QUALIFIED APPLICATIONS	268,444 (55.7%)	681,648 (61.2%)	1,455,187 (66.8%)	2,258,043 (66.2%)	2,390,320 (66.0%)
NUMBER AND PERCENT OF NON-QUALIFIED APPLICATIONS	213,887 (44.3%)	432,436 (38.8%)	723,509 (33.2%)	1,150,675 (33.8%)	1,231,321 (34.0%)
CLASSES OF ELIGIBLE APPLICANTS	FULL-TIME FRESHMAN	FULL-TIME FRESHMAN AND SOPHOMORES	FRESHMAN SOPHOMORES JUNIORS	ALL UNDERGRADUATES	ALL UNDERGRADUATES
NUMBER OF RECIPIENTS	185,249	573,403	1,228,034	1,945,454	1,863,990
TOTAL EXPENDITURES	$49,873,951	$356,536,667	$936,543,134	$1,473,814,387	$1,587,863,624
AVERAGE BEOG GRANT	$269	$622	$763	$758	$852
MINIMUM BEOG GRANT	$ 50	$ 50	$200	$200	$200
MAXIMUM BEOG GRANT	$452	$1,050	$1,400	$1,400	$1,400

Table 2 Summary Statistics by Type of Institution

Table 2 presents summary statistics by type of institution. The total number of institutions participating in the Basic Grant Program during academic year 1977-78 was 4,679, which were placed into 5 type categories: Universities, Other Four-Year Institutions, Two-Year Institutions, Institutions with Programs of One-Year but less than Two-Years, and Institutions with Programs of Six Months but less than One-Year.

It should be noted that the primary distinction between universities and other four-year institutions is that universities award advanced degrees, such as graduate or law degrees, whereas other four-year institutions generally award only a baccalaureate degree. There were 1,636 two-year institutions representing a larger proportion than any other type of institution. Total recipients attending all types of institutions was 1,846,080. Of this total figure, over 75% of those recipients attended either a university or two-year institution, with the greatest number of recipients, 793,528, attending universities.

Funding of recipients for all types of institutions was $1,574,999,886. The largest disbursement of Basic Grant funds to any type of institution was $714,848,410 to universities. This figure represents approximately 45% of the total expenditures.

Another program variable directly related to those previously mentioned is average grant. Overall, the average grant was $853, with the highest average grant being $954 for four-year institutions and the lowest average grant being $747 for two-year institutions.

TABLE 2
MASTER SUMMARY STATISTICS BY TYPE OF INSTITUTION
ACADEMIC YEAR 1977-78

TYPE OF INSTITUTION	NUMBER OF INSTITUTIONS	TOTAL ESTIMATED EXPENDITURES	NUMBER OF RECIPIENTS	AVERAGE GRANT
UNIVERSITIES	569	$714,848,410	793,628	$901
OTHER 4 YEAR	1,096	$303,096,534	317,790	$954
2 YEAR	1,636	$466,205,870	623,754	$747
1 YEAR BUT LESS THAN 2 YEARS	264	$29,226,387	36,122	$809
6 MONTHS BUT LESS THAN 1 YEAR	1,114	$61,622,685	74,786	$824
OTHER	0	$0	0	$0
TOTAL	4,679	$1,574,999,886	1,846,080	$853

Table 3A Distribution of Basic Grant Recipients by Student Eligibility Index Range and Family Income

Table 3A is a distribution of the total number of Basic Grant recipients by Student Eligibility Index and Family Income. The income class intervals are in $3,000 ranges, with the student eligibility indices in 200 point ranges, except for the first category which indicates the number of recipients who received a zero eligibility index.

Basic Grants were awarded to 1,846,080 recipients. It should be noted that 1,110,346 recipients, constituting 60% of the total number of Basic Grant recipients for academic year 1977-78, reported family incomes of $6,000 or less. Of this 60%, 658,370 recipients, constituting 35.6% of the total, reported family incomes of $3,000 or less.

It is interesting to note that of the total Basic Grant recipients, 925,017, or slightly more than 50 percent, had student eligibility indices of zero. Moreover, of those recipients with zero student eligibility indices, 171,342 or 18.4% had family incomes of $9,001 or more.

Table 3B Distribution of Basic Grant Recipients by Student Eligibility Index Range and Family Income

Table 3B is a distribution of total dependent recipients by Student Eligibility Index and Family Income. The number of dependent Basic Grant recipients was 1,135,947. Of this total, 621,737 dependent recipients, which constituted 54.7% of the total number of dependent recipients, reported family incomes of $6,000 or less.

As Table 3B indicates, 768,485 or 67.7% of dependent recipients had student eligibility indices of 400 or less, with 465,821 or 41% of the total dependent recipients having received student eligibility indices of zero. Of the 768,485 dependent recipients with student eligibility indices of 400 or less, 436,968 or 56.9% had family incomes of $6,000 or less. In addition, 73,242 or 6.4% of the dependent recipients had student eligibility indices ranging from 1,001 to 1,200.

Table 3C Distribution of Basic Grant Recipients by Student Eligibility Index Range and Family Income

Table 3C is a distribution of total independent recipients by Student Eligibility Index and Family Income.

The total number of independent Basic Grant recipients was 710,133. Of this total, 488,609 or 68.7% of the independent recipients reported family incomes of $6,000 or less. In comparing dependent recipients to independent recipients, 54.7% of dependent recipients reported family incomes of $6,000 or less, whereas 68.7% of independent recipients reported family incomes within this range.

Moreover, 459,196 or 64.7% of independent recipients had student eligibility indices of zero. Of those independent recipients with zero student eligibility indices, 319,816 or 69.5% had family incomes of $6,000 or less. Only 29,119 or 4.1% of the independent recipients had student eligibility indices in the 1,001 to 1,200 range.

Table 4A Distribution of Basic Grant Recipients by Family Income and Grant Level

Table 4A is a distribution of total Basic Grant recipients by Family Income and Grant Level. The grant levels show ranges of awards up to and including the maximum award of $1,400.

Of particular interest in Table 4A is the total number of recipients who received the maximum Basic Grant award of $1,400. During the 1977-78 academic year, 142,596 or 7.7% of the total recipient population received the maximum award. Of those recipients who received the maximum award, 50,834 reported family incomes ranging from $0 to $3,000. Another 35,180 reported family incomes ranging from $3,001 to $6,000. These two income ranges accounted for approximately 60% of those recipients receiving the maximum award of $1,400.

Table 4A also indicates that 753,206 or 40.7% received awards of $799 or less. Basic Grant awards ranging from $800 to $1,399 were also awarded to 950,278 or 51.4% of the recipient population.

There were 658,370 recipients who had family incomes ranging from $0 to $3,000. Of those recipients in that income range, 355,920 or 54% received grants ranging from $400 to $999.

Table 4B Distribution of Basic Grant Recipients by Family Income and Grant Level

Table 4B is a distribution of total dependent recipients by Family Income and Grant Level. The same grant levels and income ranges as listed in Table 4A are replicated in Table 4B.

Table 4B indicates that 621,737 dependent recipients reported family incomes of $6,000 or less. This constituted 54.7% of the total dependent recipients. Of those reporting family incomes of $6,000 or less, 445,128 or 39.2% of the total dependent recipients received grants ranging from $400 to $1,199.

As shown by Table 4B, 605,324 dependent recipients received grants ranging from $400 to $999. This accounted for 53.2% of all dependent recipients.

Table 4C Distribution of Basic Grant Recipients by Family Income and Grant Level

Table 4C is a distribution of total independent recipients by Family Income and Grant Level. Independent recipients constituted 710,133 or 38.5% of the total Basic Grant recipient population.

As Table 4C indicates, 385,393 or 54.1% of the independent recipients received grants ranging from $400 to $999 which compares to 53.6% of the total recipient population in these same grant levels.

Table 4C also indicates that 488,609 independent recipients reported family incomes of $6,000 or less. Of those independent recipients who reported family incomes of $6,000 or less, 353,284 or 49.7% of all independent recipients received Basic Grant awards ranging from $400 to $1,199. In addition, 56,676 or 7.9% of independent recipients received the maximum award of $1,400.

Table 4D Distribution of Basic Grant Recipients by Family Income and Grant Level

Table 4D is a distribution of Social Security recipients by Family Income and Grant Level. Table 4D shows that 215,123 Social Security recipients received Basic Grant assistance during the 1977-78 academic year. Social Security recipients constituted 11.7% of the total Basic Grant recipient population.

A review of Table 4D shows that 120,619 or 56.1% of the Social Security recipients reported family incomes of $6,000 or less. From that figure, 70,546 or 32.8% of the Social Security recipient population, reported family incomes of $3,000 or less.

Of particular interest are the grant levels for Social Security recipients. There were 78,258, or 36.3% of Social Security recipients who received awards of $799 or less. Another 120,434 or 55.9% of the Social Security recipients, received Basic Grant awards ranging from $800 to $1,399. Finally, 7.6% or 16,431 Social Security recipients received the maximum award of $1,400.

Table 4E Distribution of Basic Grant Recipients by Family Income and Grant Level

Table 4E is a distribution of all veterans who received Basic Grants by Family Income and Grant Level. Veteran recipients comprised approximately 6% of the total Basic Grant recipient population for academic year 1977-78.

Of particular interest in this Table is the number of veteran recipients reporting low family incomes. Table 4E indicates that there were 71,426 veteran recipients, which constituted 65.1% of the veteran population, reporting family incomes of $6,000 or less. In addition, 80,877 or 73.6% of the total veteran recipient population received Basic Grant awards ranging from $400 to $1,199, while 5,891 or 5.3% received the maximum award of $1,400.

Table 4F Distribution of Basic Grant Recipients by Family Income and Grant Level

Table 4F is a distribution of dependent veteran recipients by Family Income and Grant Level. Dependent veteran recipients constituted 2.7% of the total Basic Grant recipient population.

An analysis of this Table indicates that 28,071 or 57.4% dependent veteran recipients reported family incomes of $6,000 or less. Of these 28,071 dependent veteran recipients, 16,497 reported incomes of $3,000 or less, and 9,198 or 55.6% received grants ranging from $400 to $999. Only 1,034 or 6.2% received the maximum grant.

Of all dependent veterans who reported family incomes of $6,000 or less, 10,784 or 22% received Basic Grant awards of $799 or less. Furthermore, 26,654 or 54.3% dependent veteran recipients received awards ranging from $800 to $1,399, while 2,996 or 6.1% dependent veteran recipients received the maximum Basic Grant award of $1,400.

Table 4G Distribution of Basic Grant Recipients by Family Income and Grant Level

Table 4G is a distribution of total independent veteran recipients by Family Income and Grant Level. Total independent veteran recipients constituted 3.3% of the total Basic Grant recipient population.

An analysis of Table 4G indicates that 43,355 or 71.4% independent veterans reported family incomes of 6,000 or less. Of this figure, 31,947 or 52.6% of independent veteran recipients received Basic Grant awards ranging from $400 to $1,199.

Another pertinent statistic is that 30,025 or 49.4% independent veterans received Basic Grant awards of $799 or less; 27,810 or 45.6% received awards ranging from $800 to $1,399, while 2,895 or 4.7% received the maximum Basic Grant award of $1,400.

Table 5A Distribution of Basic Grant Recipients by Educational Cost Range and Grant Level

Table 5A is a distribution of all Basic Grant recipients by Educational Cost Range and Grant Level. It should be noted that the educational cost ranges are in $300 increments after the first educational cost range of $1,500 or less.

Table 5A indicates that 1,248,970 or 67.7% of all Basic Grant recipients attended postsecondary institutions where the educational costs ranged from $1,501 to $2,700. Also, 76,043 or 4.1% of all Basic Grant recipients attended postsecondary institutions where the educational costs were $1,500 or less. These recipients received Basic Grant assistance of less than $799.

Table 5A also shows that 300,746 or 16.3% of all Basic Grant recipients attended postsecondary institutions where the educational costs ranged from $2,701 to $3,600. Also 220,321 or 11.9% of all Basic Grant recipients attended postsecondary institutions where the educational costs were $3,601 or more.

Table 5B Distribution of Basic Grant Recipients by Educational Cost Range and Grant Level

Table 5B is a distribution of all dependent Basic Grant recipients by Educational Cost Range and Grant Level. It should be noted that the educational cost ranges are in $300 increments after the first educational cost range of $1,500 or less.

Table 5B indicates that 747,813 or 65.8% of all dependent Basic Grant recipients attended postsecondary institutions where the educational costs ranged from $1,501 to $2,700. Also, 32,265 or 2.8% of all dependent Basic Grant recipients attended postsecondary institutions where the educational costs were $1,500 or less. These received Basic Grant assistance of less than $799.

Table 5B also shows that 195,344 or 17.2% of all dependent Basic Grant recipients attended postsecondary institutions where the educational costs ranged from $2,701 to $3,600. Also 160,525 or 14.1% of all dependent Basic Grant recipients attended postsecondary institutions where the educational costs were $3,601 or more.

Table 5C Distribution of Basic Grant Recipients by Educational Cost Range and Grant Level

Table 5C is a distribution of all independent Basic Grant recipients by Educational Cost Range and Grant Level. It should be noted that the educational cost ranges are in $300 increments after the first educational cost range of $1,500 or less.

Table 5C indicates that 501,157 or 70.6% of all independent Basic Grant recipients attended postsecondary institutions where the educational costs ranged from $1,501 to $2,700. Also, 43,778 or 6.2% of all independent Basic Grant recipients attended postsecondary institutions where the educational costs were $1,500 or less. These recipients received Basic Grant assistance of less than $799.

Table 5C also shows that 105,402 or 14.8% of all independent Basic Grant recipients attended postsecondary institutions where the educational costs ranged from $2,701 to $3,600. Also 59,796 or 8.4% of all independent Basic Grant recipients attended postsecondary institutions where the educational costs were $3,601 or more.

Table 6A Distribution of Basic Grant Recipients by Student Eligibility Index Range and Grant Level

Table 6A is a distribution of total Basic Grant recipients by Student Eligibility Index Range and Grant Level. The grant levels show ranges of awards up to and including the maximum award of $1,400. The student eligibility indices are distributed in 200 point ranges except for the first category which indicates the number of recipients who received zero student eligibility indices.

Table 6A indicates that 925,017 or 50.1% of the total recipient population had student eligibility indices of zero, with 69.3% of those recipients with zero student eligibility indices receiving Basic Grant awards ranging from $400 to $1,199. In addition, 142,596 recipients, which constituted 7.7% of the total recipient population, received the maximum grant of $1,400.

Furthermore, 401,330 recipients or 21.7% had student eligibility indices ranging from 1 to 400 and received Basic Grant awards of $1,399 or less. Also, 417,372 recipients, which constituted 22.6% of the total recipient population, had student eligibility indices ranging from 401 to 1,000, and they received awards of $999 or less. There were 102,361 or 5.5% of the total number of recipients who had eligibility indices of 1,001 to 1,200. These recipients received awards of $799 or less.

Table 6B Distribution of Basic Grant Recipients by Student Eligibility Index Range and Grant Level

Table 6B is identical to table 6A with the exception that this table was produced for dependent recipients only. Table 6B indicates that 465,821 dependent recipients, or 41% of the total number of dependent recipients, had eligibility indices of zero. Of those dependent recipients with zero eligibility indices, 313,185 dependent recipients or 67.1% received Basic Grant awards ranging from $400 to $1,199, while 85,920 dependent recipients or 18.4% received the maximum award of $1,400.

In addition, 302,664 dependents or 26.6% had student eligibility indices ranging from 1 to 400. Also, 294,220 or 25.9% of the dependent recipients had eligibility indices ranging from 401 to 1,000, and 73,242 or 6.4% had eligibility indices ranging from 1,001 to 1,200.

As Table 6B shows, 440,239 dependent recipients received awards of $799 or less. These recipients comprised 38.6% of the total dependent recipient population. In addition, 609,788 or 53.6% of the dependent recipients received awards ranging from $800 to $1,399, and 85,920 or 7.5% of the dependent recipient population received the maximum award of $1,400.

Table 6C Distribution of Basic Grant Recipients by Student Eligibility Index Range and Grant Level

Table 6C was produced for independent recipients who are distributed by Student Eligibiltiy Index Range and Grant Level.

This Table shows that 459,196 or 64.7% of independent recipients had student eligibiltiy indices of zero. Of these independent recipients with zero student eligibiltiy indices, 364,273 or 79.2% received grants ranging from $400 to $1,399, with 56,676 or 12.3% receiving the maximum grant.

Furthermore, 98,666 or 13.9% of the independent recipients had eligibility indices ranging from 1 to 400; 123,152 or 17.3% had eligibility indices ranging from 401 to 1000; and 29,119 or 4.1%, had student eligibility indices ranging from 1001 to 1200.

Table 7A Distribution of Basic Grant Recipients by Student Eligibility Index Range and Type of Institution

Table 7A shows the distribution of Basic Grant recipients by Student Eligibility Index and Type of Institution. The categories of institutions presented in this table are identical to those reported on the Institutional Progress Report.

Of the 1,846,080 Basic Grant recipients, 793,628 attended universities and 623,754 attended two-year institutions. The Basic Grant recipients enrolled at these two types of institutions accounted for over 75% of all recipients.

As Table 7A shows, 359,612 or approximately 45% of the Basic Grant recipients enrolled in universities had student eligibility indices of zero. Another 111,644 or 14.1% of the recipients enrolled in universities had student eligibility indices in the 1 to 200 range. In comparison, 356,986 or approximately 57% of the recipients enrolled in two-year institutions had student eligibility indices of zero and 72,451 or approximately 12% had student eligibility indices in the 1 to 200 range.

Table 7B Distribution of Basic Grant Recipients by Student Eligibility Index Range and Type of Institution

Table 7B indicates the distribution of dependent Basic Grant recipients by Student Eligibility Index Range and Type of Institution.

Dependent Basic Grant recipients show the same trends in enrollment and student eligibility index as the total recipient population. As indicated by the table, 536,455 or approximately 47% were enrolled in universities and 326,624 or almost 29% were enrolled in two-year institutions, thus accounting for approximately 76% of the dependent recipients.

Of the 536,455 dependent recipients enrolled in universities, 207,034 or 38.6% had student eligibility indices of zero and 91,097 or 17% had student eligibility indices in the 1 to 200 range. This same trend is shown in two-year institutions, with 152,825 or 46.8% of the 326,624 dependent recipients having student eligibility indices of zero and 53,708 or 16.4% with student eligibility indices in the 1 to 200 range.

Table 7C Distribution of Basic Grant Recipients by Student Eligibility Index Range and Type of Institution

Table 7C shows the distribution of independent Basic Grant recipients by Student Eligibility Index and Type of Institution.

As indicated by Table 7C, 297,130 independent recipients were enrolled in two-year institutions, which accounted for 41.8% of the independent recipients. In addition, 257,173 or approximately 36% of the independent recipients were enrolled in universities. Altogether, these two types of institutions accounted for over 78% of the independent recipients.

Of the 297,130 independent recipients enrolled in two-year institutions, 204,161 or 68.7% had student eligibility indices of zero. In addition, 152,578 or more than 59% of the 257,173 independent recipients in universities had student eligibility indices of zero.

Table 8A Distribution of Basic Grant Recipients and Average Grant by Type of Institution and Grant Level

Table 8A indicates the distribution of Basic Grant recipients and average grant by Type of Institution and Grant Level.

As indicated by Table 8A, 793,628 or approximately 43% of the Basic Grant recipients enrolled in universities. Some 203,430 or 25.6% of these recipients received grants in the $1,000 to $1,199 range and another 196,826 or 24.8% received grants in the $800 to $999 range. An additional 186,353 or 23.5% of the recipients enrolled in universities received grants ranging from $400 to $799. Grants ranging from $400 to $1,199 were received by 73.9% of these recipients. The average grant at universities was $900.

However, the trends for the 623,754 or 33.8% of the recipients enrolled at two-year institutions were somewhat different. Some 238,542 or 38.2% received grants in the $400 to $799 range. Also, 197,283 or 31.6% received grants in the $800 to $999 range and 96,137 or 15.4% received grants of $399 or less. Therefore, 85.3% of the Basic Grant recipients who attended two-year institutions received grants of $999 or less. The average grant at two-year institutions was $747.

Of the 1,846,080 recipients, 535,996 or 29% received grants ranging from $400 to $799, 454,721 or 24.6% received grants ranging from $800 to $999 and another 336,031 or 18.2% received grants in the $1,000 to $1,199 range. Approximately 72% of the recipients received grants ranging from $400 to $1,199.

Table 8B Distribution of Basic Grant Recipients and Average Grant by Type of Institution and Grant Level

Table 8B shows the distribution of dependent Basic Grant recipients and average grant by Type of Institution and Grant Level.

As Table 8B indicates, 536,455 or approximately 47% of the dependent recipients enrolled in universities. Over 73% of those dependent recipients enrolled in universities received grants ranging from $400 to $1,199, with 127,767 or 23.8% in the $400 to $799 range. There were 140,058 or 26.1% in the $800 to $999 range, and another 128,409 or 23.9% received grants in the $1,000 to $1,199 range. The average grant for dependent recipients enrolled in universities was $898.

As shown in Table 8B, of the 326,624 dependent recipients enrolled in two-year institutions, 122,261 received grants ranging from $400 to $799 and another 107,817 received grants ranging from $800 to $999. The average grant at two-year institutions for dependent recipients was $766.

Moreover, of the 1,135,947 dependent recipients, 318,898 received grants in the $400 to $799 range. Another 286,426 received grants in the $800 to $999 range and an additional 209,081 received grants ranging from $1,000 to $1,199. Approximately 72% of the dependent recipients received grants ranging from $400 to $1,199.

Table 8C Distribution of Basic Grant Recipients and Average Grant by Type of Institution and Grant Level

Table 8C shows the distribution of independent Basic Grant recipients and average grant by Type of Institution and Grant Level.

As indicated by Table 8C, 297,130 of the independent recipients were enrolled in two-year institutions. Of these independent recipients, 116,281 received grants ranging from $400 to $799 and 89,466 received grants ranging from $800 to $999. The average grant at two-year institutions for independent recipients was $726.

Another 257,173 independent recipients were enrolled in universities, with an average grant of $904. Of these independent recipients, 58,586 received grants ranging from $400 to $799, 56,768 received grants in the $800 to $999 range and another 75,021 received grants ranging from $1,000 to $1,199.

Table 9A Distribution of Basic Grant Recipients by Student Eligibility Index Range and Educational Cost Range

Table 9A shows the distribution of Basic Grant recipients by Student Eligibility Index Range and Educational Cost Range.

A total of 925,017 Basic Grant recipients had student eligibility indices of zero, which accounted for approximately 50% of the recipient population. Of these recipients, 231,118 or 24.9% attended institutions with educational costs of $1,801 to $2,100. Another 164,030 or 17.7% enrolled in institutions with educational costs ranging from $2,101 to $2,400, and an additional 161,249 or 17.4% attended institutions with educational costs ranging from $1,501 to $1,800. Therefore, 60% of the recipients with zero student eligibility indices enrolled in institutions with educational costs ranging from $1,501 to $2,400.

Table 9A also shows that 442,864 or 23.9% of the total Basic Grant recipients were enrolled in institutions with educational costs ranging from $1,801 to $2,100. In addition, 58.7% of the total recipients enrolled in institutions with educational costs ranging from $1,501 to $2,400. However, 220,321 or 11.9% of the recipients were enrolled in institutions with educational costs of more than $3,600. It is interesting to note that, of the 442,864 recipients enrolled in institutions with educational costs ranging from $1,801 to $2,100, 231,118 or approximately 52% had student eligibility indices of zero.

Table 9B Distribution of Basic Grant Recipients by Student Eligibility Index Range and Educational Cost Range

Table 9B indicates the distribution of dependent Basic Grant recipients by Student Eligibility Index Range and Educational Cost Range.

As shown in Table 9B, 465,821 or 41% of the dependent recipients had student eligibility indices of zero. Of these dependent recipients, 107,607 or 23.1% were enrolled in institutions with educational costs ranging from $1,801 to $2,100.

Also, 253,189 or 22.2% of all dependent recipients were enrolled in institutions with educational costs ranging from $1,801 to $2,100. Within this cost category, 107,607 or approximately 42% had student eligibility indices of zero.

Table 9C Distribution of Basic Grant Recipients by Student Eligibility Index Range and Educational Cost Range

Table 9C shows the distribution of independent Basic Grant recipients by Student Eligibility Index Range and Educational Cost Range.

As Table 9C indicates, 459,196 independent recipients had zero student eligibility indices, of which 123,511 or 26.9% were enrolled in institutions with educational costs ranging from $1,801 to $2,100.

As shown in Table 9C, 189,675 or 25.7% of the independent recipients were enrolled in institutions with educational costs ranging from $1,801 to $2,100. Of this number, 123,511 or approximately 65% had zero student eligibility indices, while only 7,524 or approximately 4% had student eligibility indices in the 1,001 to 1,200 range.

Table 10A Distribution of Basic Grant Recipients by Family Income Range and Educational Cost Range

Table 10A indicates the distribution of Basic Grant recipients by Family Income Range and Educational Cost Range.

Table 10A shows that a total of 1,086,639 or approximately 59% of the Basic Grant recipients had educational costs ranging from $1,501 to $2,400. Of that number, 280,736 or approximately 15% of all Basic Grant recipients were enrolled in institutions with costs ranging from $1,501 to $1,800. Another 442,864 or approximately 24% of all recipients had costs in the $1,801 to $2,100 educational costs range and 363,039 or approximately 20% of recipients enrolled in institutions with costs ranging from $2,101 to $2,400.

By far the largest number of students in each of these three educational cost ranges reported family incomes of $3,000 or less. As shown in Table 10A, 107,433 or approximately 38% of the recipients with educational costs ranging from $1,501 to $1,800 had family incomes in the $0 to $3,000 range. In addition, 159,622 or approximately 36% of the recipients with educational costs in the $1,801 to $2,100 range had family incomes ranging from $0 to $3,000. Also, 126,147 or approximately 35% of the recipients with educational costs ranging from $2,101 to $2,400 had family incomes in the $0 to $3,000 range. Of the 1,846,080 total recipients, 1,110,346 or approximately 60% of the Basic Grant recipients had family incomes of $6,000 or less.

Table 10B Distribution of Basic Grant Recipients by Family Income Range and Educational Cost Range

Table 10B shows the distribution of dependent Basic Grant recipients by Family Income Range and Educational Cost Range.

The data for dependent Basic Grant recipients indicates trends similar to the total recipient population, with 253,189 or 22.3% enrolled in institutions with educational costs in the $1,801 to $2,100 range, 224,028 or 19.7% with costs ranging from $2,101 to $2,400 and 164,506 or 14.5% with educational costs in the $1,501 to $1,800 range. This means that 641,723 or approximately 56% of all dependent recipients were enrolled in institutions with educational costs ranging from $1,501 to $2,400. Moreover, 621,737 or 54.7% of the dependent recipients had family incomes of $6,000 or less, and of that number, 137,152 or approximately 22% were enrolled in institutions with educational costs ranging from $1,801 to $2,100.

Table 10C Distribution of Basic Grant Recipients by Family Income Range and Educational Cost Range

Table 10C indicates the distribution of independent Basic Grant recipients by Family Income Range and Educational Cost Range.

Independent recipients showed similar trends to the dependent recipients and the total recipient population, with 444,916 or 62.6% enrolled in institutions with educational costs ranging from $1,501 to $2,400. Of all independent recipients, 116,230 or 16.4% had educational costs of $1,501 to $1,800, another 189,675 or 26.7% had costs of $1,801 to $2,100 and 139,011 or 19.5% enrolled in institutions with educational costs ranging from $2,101 to $2,400.

As indicated by Table 10C, 488,609 or 68.7% of the independent recipients had family incomes of $6,000 or less, and of that number, 131,208 or 26.9% enrolled in institutions with educational costs ranging from $1,801 to $2,100.

Table 11 Summary Statistics by Type of Control of Institution

Table 11 presents a summary of Total Expenditures, Total Recipients and Average Grant by Type and Control of Institution.

Of the three institutional controls (Public, Private Non-Profit, Private Profit-Making), Public Institutions received the largest share ($1,064,620,953), approximately 68% of the total Basic Grant expenditures. Private Profit-Making Institutions received the smallest share ($140,926,725), approximately 9% of the total expenditures. Public Institutions had 1,318,055 recipients in 1977-78 and Private Profit-Making Institutions had 162,733 recipients.

Despite the fact that Public Institutions had the largest expenditures and number of recipients, their average grant was $807. In comparison, the average grant at Private Non-Profit Institutions was $1,011 and the average grant at Private Profit-Making Institutions was $865. The lowest average grant, $566, was at Public Institutions with Programs of One Year but less than Two Years. The smallest number of recipients, 504, were enrolled in Private Non-Profit Institutions with Programs of Six Months but less than One Year.

Again, it should be noted that the category "Other" has been included in Table 11, although there are no entries in this category resulting from improved methods of data editing in the computer processing of Basic Grant records.

TOTAL	$1,574,999,886	1,846,080	$853

Table 12 Distribution of Basic Grant Recipients by State and Control of Institution

Table 12 shows the distribution of Basic Grant recipients by State and Control of Institution.

As indicated by Table 12, only three states had more than 100,000 recipients, these being New York with 206,451, California with 131,290 and Texas with 102,834. The collective number of recipients in these three states represented 490,575 or 26.6% of the total number of Basic Grant recipients. However, it should be noted that the category "All Others," which includes Guam, Puerto Rico, Virgin Islands and the U.S. Trust Territories had a recipient figure of 100,718.

In Public Institutions, six states had more than 50,000 recipients. These six states, California, New York, Texas, Illinois, Florida and Michigan had a collective total of 529,850 recipients or 40.2% of the entire recipient population for Public Institutions.

Table 12 also indicates that in Private Non-Profit Institutions nine states; California, Illinois, Massachusetts, New York, North Carolina, Ohio, Pennsylvania, Tennessee and Texas had a recipient figure exceeding 10,000. These nine states accounted for 166,497 or 45.6% of the recipient figure for Private Non-Profit Institutions.

Recipients in Private Profit-Making Institutions accounted for 162,733 or 8.8% of the total recipient population. Of these 162,733 recipients in Private Profit-Making Institutions, 57,017 or 35% were enrolled in institutions located in California, New York and Pennsylvania.

Table 13 Distribution of Basic Grant Expenditures by State and Control of Institution

Table 13 shows the distribution of Basic Grant Expenditures by State and Control of Institution.

As indicated in Table 13, total expenditures for Public Institutions were $1,064,620,953 or 67.6% of the total expenditures for the Basic Educational Opportunity Grant Program. In addition, total expenditures for Private Non-Profit Institutions were $369,452,208 or 23.5% of the total expenditures, while total expenditures for Private Profit-Making Institutions were $140,926,725 or 8.9% of the total expenditures for the Basic Grant Program.
